Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 20 claims.

Specification

The disclosure is objected to because of the following informalities:
on page 2, line 4 (from the bottom) "FIG. 5 (second occurrence) should be - - FIG. 6 - -",
on page 4, lines 12 and 22, "FIG. 2" apparently should be - - FIG 5 - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 8, 9, 13, 14 and 17 rejected under 35 U.S.C. 103(a) as being unpatentable over Kordecki (Pat No 5,022,616) in view of Malone et al. (Pat No. 4,895,327).

The patent to Kordecki discloses a baby bottle holder comprising a support member (12) resting on a baby's torso, and a bottle holder defined by a base, sides (36) and adjusting

Art Unit: 3632

member (22), the holder extending upwardly from the support member and movable with respect to it (see Fig 3).

The patent to Malone et al. discloses another baby bottle holder comprising a weighted support member (13) for resting on a baby's torso (see Fig 1).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the device shown by Kordecki with a weighted support member as shown by Malone et al. to minimize the weight place on a baby during feeding and better fit a baby's torso, since the weight of the support is of light weight and more soft than the material used on Malone et al. support member.

Allowable Subject Matter

Claims 2, 3, 5-7, 10-12, 15, 16, and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suichi (2,475,923), Sprung (4,162,696), Saxton (4,788,919), Maher (5,184,796), Trumbauer et al. (5,820,084), Beck (5,979,843), Skelton (6,098,934),

Castillo (6,581,888), and Touma (US 2005/0103954 A1) all show baby bottle holders of interest but Sprung, Saxton and Castillo that show weighted material similar to the one shown here.
